The Department of Justice needs to speedily resolve the case against Microsoft. This is an unreasonable taxpayer burden. In no way should Microsoft ever be forced to allow anyone to see the source code of any of their software programs. In fact all charges should be dropped. Microsoft and Mr. Bill Gates have done more for computing have made business productivity greater than it has ever been before and Microsoft should be allowed to continue unabated. The US Department of Justice needs to drop this case and all charges NOW! ps. I am not in any way associated with the Microsoft Corporation. I simply buy and use their products.
